
Super Picture Finder Grabber 4.15 For PC [April-2022]

[Download](#)

Super Picture Finder Grabber is a handy image grabber utility that helps you scan certain websites, in order to find and download any images found. The application gives you the possibility to scan a website for images,

then download the contents Whenever you find websites that contain useful or interesting images, but cannot download them manually because that would take a lot of time, you could use the program to automatically do it for you. It can scan a website address, along

with its subpages,
then download any
found images. It
supports the most
common image formats,
such as GIF, JPG,
JPEG, TIF, TIFF, BMP,
PCX, PNG or WMF. You
can apply several
filters before
scanning and
downloading images, so
that you only receive

relevant results. By doing so, you can download, for instance, only images that do not exceed a certain amount of memory, or that are not smaller than a specified size. In addition, you can set the application to download only the image formats that you

want, avoiding the ones that are not useful for you. Super Picture Finder Grabber allows you to customize the search patterns and options, by adjusting the search depth. This way, you can adjust the program to search images only to a certain extent,

ignoring subfolders that exceed the depth limit. Additionally, you can easily exclude certain files from download, by creating a list with all the prohibited filenames. This gives you the possibility to avoid certain generic images, such as logos, thumbnails, or

buttons. Super Picture Finder Grabber can help you schedule your website scans and image downloads, by selecting a recurring time. Besides, the application can be set to automatically shut down after it finishes downloading images, so you do not have to constantly keep an eye

on your computer.

Super Picture Finder

Grabber 4.15 Features:

- * Easy to use and configure
- * Works as service under Windows

Vista/Windows

7/Windows 8/Windows 10

- * Supports the most common image formats, such as GIF, JPG, JPEG, TIF, TIFF, BMP, PCX, PNG or WMF *

Windows Software Do
you like to know what
those seemingly random
sites are? Well, Super
Picture Finder Grabber
will definitely help
you find them. That's
because it can
automatically scan the
web and download any
image found. You don't
need to be
particularly

interested in the content of those sites, you just need to be interested in images. Whenever you find websites that contain useful or interesting images, but cannot download them manually because that would take a lot of time, you could use the program to

automatically do it for you. It can scan a website address, along with its subpages, then download any found images. It supports the most common image formats, such as GIF, JPG, JPEG, TIF, TIFF, BMP, PCX, PNG or WMF. You can apply several filters before
