This can be used to standardize design across projects, facilitate reusable designs for other projects, and to minimize the need for creating new objects every time. (video: 1:45 min.) Makes the typical design process faster and easier. You can create and design with a library of standard objects with AutoCAD, and easily switch between designs. (video: 1:42 min.) Context-aware drawing tools: Bring design-related information directly to your drawings. Access the data that you need to make your drawings better and more productive at any time. The information is already available, but instead of pulling it into your drawings, you simply select it and use it. (video: 3:31 min.)
