"I like this game because you can customize your character and the events keep me coming back for more. I usually just play single player, but I don't mind the asynchronous online play or the different character archetypes that can be created. I haven't had a chance to have enough people online to be able to visit everyone's places, but I'd love to. The game just keeps me intrigued until the end." "I like playing this game because it is a very realistic RPG where you can create a wide variety of different character archetypes and customize everything to your heart's content. You can develop your character according to your play style, whether it is a fighter, mage, thief, etc. I usually tend to be more of a fighter, but I'm certainly no slouch.:) I love being able to create a character the way I want to instead of just picking what the game tells me I should be. I also love that it is a fantasy game, but still incorporates a very realistic feel as far as the performance of your character's skills and actions." "The best aspect of the game is that it is completely unique. It is one of those rare situations where, as a player, I can make my own choices that determine the game. This is a game that allows me to avoid typical game mechanics and create my own story, and the customization options are pretty extensive. I'd say that the game offers a plethora of choice and options for players to play the game how they want, with a variety of characters." "I like the story because it is very original. The development of the story happens quickly and the choices you make are extremely realistic. I like that it is a fantasy game that can completely be played in a manner you choose. There is no pressure to be a certain way, you can be a very love that all of the characters have their own unique stories, what you do matters to each one of them. This game encourages me to participate in a way that most RPGs don't, which I like." "I like this game because of the variety of characters and the plethora of decisions I can make. A
