The more intense the situation, the faster you can react, and the more responsive your controls will feel. We worked with a wide range of football players in The Netherlands and Spain to capture the movements of real-world players. FIFA's game engine has been updated to use the new movement data, and, as a result, the artificial intelligence of your players has been upgraded, so you can now see players run more with more speed and unpredictability. **POWER UP YOUR POWER:** Passing: A new goal-scoring toolkit — new gameplay features use your players' movement data. New Active Touch feature will make passes a lot more skilful and complicated, for more control. See players better thanks to new Optimal ball control system. Improved "Close Control" - more goal-scoring opportunities from crosses.

Defending: The speed, unpredictability and intensity of your opponent's attacks will be much more lifelike. Mastered AI - more defenders are prepared for the attack, and hectic, tactical moments are rarer. Fighting: The most dangerous moments in any match are the physical challenges involved, such as tackles, headers and traps. This will be more realistic thanks to the new HyperMotion Technology. Master the timing and power of 1-on-1 challenges. Experience the fight in more visually-pleasing and intense combats thanks to a new 3D graphics engine, camera

system and improved collision system. **PLAY LIKE A REAL PRO:** Boost your Player Performance through Training Mode with new Player Abilities. “New Moves” adds depth and unpredictability to your passing and tackling. “Change of Direction” uses your players’ movement data to improve dribbling, runs and passes. “Strength” optimizes game-wide performance for more balanced and varied match situations. The “New Pass Options” allows you to distribute the ball with more control. Your training sessions will feel more realistic thanks to a new run tracking system. **BUILD STRENGTH:** Tactical and physical training modes for all in-game content. Intensity Mode that uses your players’ movement data to learn and improve your players’ abilities. Discover and unlock

Gameplay: Goalkeeper Now you can master positioning and the arts of glove handling and stump-sapping. FIFA 21 introduces a new goalkeeper coming in a complete revamp of goalkeeper movement and goalkeepers' reactions to scoring opportunities. The goalkeeper's new high speed movements give you precision on positioning and follow up as you get closer to goals. From pulling off breathtaking saves to creating goal-saving reactions, the goalkeeper's new range of special moves allow you to feel more authentic and connected to your keeper's gameplay and decisions. Offside Control when your striker is being tracked and react more aggressively to stopping a counter-attack to score a goal. React more aggressively to headers to keep the goal out Iker Casillas was the best in the world and now he's back...back up the goal to you! FIFA 21's defender mechanics now introduce a true interpretation of the pitch-side movement of your players. When in possession, defenders will perform more aggressive passes and use short, square passes to break out of defensive lines. Containment Attack your opponents, influence the pace of the game, and make your fans get on your side." FIFA 21 reintroduces the Containment system for the first time since FIFA 14, as a key component of our brand new brand of tactics and gameplay. Through clever player positioning and movement in your opponent's penalty area, you can slow the game down or pressure your opponent to break out through effective defensive pressing. Use tackles to win the ball back and then use it to start pressure for a shot on goal. Control possession using short, square passes to break out of your opponent's defensive lines.
