Features Key:

- Storyline: The player takes the role of Rasa Arlosh, a former godlike archivist from the United States. He wanted to become godlike archivist back in the age of Atlantis. Now he is the best of all archivists but due to him losing his soul he could no longer become godlike archivist. He tried to return to a normal life but in a terrible storm he lost the only twin that he ever had along to him. The player starts the story as a criminal - he was in jail for some petty crimes. It wasn't until he escapes from the jail, taking the godlike archivist armor, and met a girl named Anaelia(who is way prettier than he expected!) that he decided to keep that armor and to enter a race to save the universe by recovering all of the godlike archivists' souls. However, the player does not remember anything since losing his soul and thus he is weak and can't learn magical spells or fight
- Acquire godlike archivists's souls. Each of these archivists' souls belongs to one unique dimension and if the player collects all of them he will be able to face the other archivists.
- Easy control and smooth battles. It's easy to play using one hand and believe in yourself. Why are you not enjoying Tower Defense games? Maybe you thought they are too cumbersome for you to play.
- Challenging play. The difficult, challenging characters are nice to play even by yourself without help.
- Commendable story! The story is very interesting and lets you deduce the reason why he won't be going back to the same place that he was before his journey.
