I'm just a girl that believes there are many smart people in this world that haven't been noticed yet. Come under my opinion: I can help you to fix the vocabulary and grammar errors in this site. So please click the button below to let me know you are interested.The G/G genotype of the apolipoprotein-E polymorphism and risk of Alzheimer's disease. The apolipoprotein E (APOE) gene plays a major role in cholesterol metabolism and is a strong candidate for being involved in the pathogenesis of Alzheimer's disease (AD). The association between APOE polymorphisms and AD risk was examined in 175 AD patients and 251 age-, race-, and gender-matched controls from the Bronx Aging Study (BIGS). The following alleles/genotypes were analysed: the epsilon4 allele (epsilon4/epsilon4), epsilon3 allele (epsilon3/epsilon3), and epsilon2 allele (epsilon3/epsilon4
