o2c_2Go is an o2c editing and publishing tool. It is designed specifically for users who need to create, edit, and view materials using o2c. o2c_2Go provides material design tools that help users to quickly and efficiently create virtual prototypes of materials for use in o2c_2Go. The objective of o2c_2Go is to improve workflow for less experienced users. o2c_2Go is built on top of the freely available, popular o2c player, which you can download here: o2c_2Go Features:

- Material creation: easy to create and edit material to include o2c material properties (shading, anti-aliasing,

and more) ◦ Manage properties: preview textures, see property values, record changes, and add properties through the interface. ◦ Tile/Chapter layers: create layers with different sets of properties so you can save, create, and render material sets. ◦ Scene separation: cut scenes from materials as they are rendered, preserving their properties ◦ Title and design notes: title the material in the o2c with a description, and attach design notes and comments to it. ◦ Render controls: controls for the rendering engine can be placed on layers in the materials scene, and hide/remove them as you prefer. ◦ Materials view and design tools: have material views and design tools

appear when you select a material in the material tree view.

- 3D viewing tools: have a 3D view of the scene automatically appear when you select a material in the materials tree view.
- A pop-up library allows the user to see what materials exist in the o2c and add them.
- New: camera view: can be added to the viewport when the right mouse button is pressed.
- New: camera view: once added, the camera view can be dragged around the scene window in a 3D environment.

o2c_2Go is a freeware program and will run on any Windows platform. It runs very well on all Windows 8 (8.1) operating systems. It is available for both 32-bit and 64-bit. You can get o2c_2Go [here](#): Have a great day!
