This was the first time in the long history of FIFA, that motion capture was used in a video game. The technology is based on the methods used in research that has led to the development of a revolutionary new concept in sports video games known as 'Player Intelligence.' The Player Intelligence concept aims to deliver a far more accurate and authentic experience for both players and spectators. The Player Intelligence technology lets you personalise and create the player that you like to see in your game. This new technology is coming to players via "Pre-Create Player". After the creation of a player, you can choose between the 22 real-life players from the 2018 FIFA World Cup who will appear in your game. The 22 real-life players are rated 1 to 9 (the exact rating will be revealed in 2018). Once a player has been created, you can customise his pitch suit and visuals, as well as his playing style. With this unique feature, you can immerse yourself in an authentic simulation of football play that is so close to the real thing that you'll get the tingles! Watch the FIFA 22 gameplay videos and watch the FIFA 22 latest trailer: PRE-CREATE PLAYER The new "Pre-Create Player" gives you the opportunity to play with the real players who were photographed during the 2018 World Cup, in FIFA 22. During gameplay, you will be able to customise your player through 3 different areas: 1. In-Game selection Each player can be customised by selecting your favourite player from the 22 real-life players from the 2018 FIFA World Cup. This includes selecting his hair style, shirt, shorts and socks. All of this can be changed at any time during the game. 2. Visuals The player's visuals will change depending on what kit he is wearing. For example, you can change his colour and details in his shirt, shorts and socks to make him look the way you want him to. 3. Pitch Suit This includes tailoring the pitch suit for your player. The pitch suit can be adjusted to fit him perfectly and his playing style. Watch the FIFA 22 "Pre-Create Player" gameplay videos: TECHNOLOGY All the real-life player movement, tackle, aerial duels and on-ball actions will be added to the new, "HyperMotion Technology.

FIFA Soccer is the best-selling videogame franchise in the history of Electronic Arts. FIFA is one of the most authentic sports games ever created, featuring realistic physics, interactive crowds and, of course, football. What's more, EA SPORTS FIFA delivers the feel of playing the most popular sport in the world, with a level of play and competition that has been proven over and over. What is Football? Football is the world's most popular sport. Check out EA Sports Football on Xbox Live Indie Games. Take the Pivotal Pass in any direction, score with a perfectly weighted cross in the box, or use a deadly sliding volley to fire in a killer shot. This year, push off on shots, choose a free kick type to set up your run, or pull off a goal celebration that fits your character. EA SPORTS FIFA delivers moments of inspiration through an atmosphere that feels like being in the stadium. Turn up the game intensity with more goal celebrations, more crowd reactions and more pitch textures as the crowds get crazier. Or create new traditions, with more locker room celebrations and all-new pre- and post-match interviews. What's New in FIFA 22? With over 125 million players worldwide, FIFA is one of the most recognized brands in the industry. Over the past seven years, FIFA has evolved and grown, adapting to the needs of its fans. We took FIFA's most popular gameplay innovations and brought them to life in FIFA 22 – from boot impacts to ball physics, goal celebrations to counters, realistic crowds to new commentator voices. The result? Over 25 per cent of the game's features have been improved, according to our data and testing. For the first time, fans can experience our Real Player Motion technology. This sophisticated suite of motion-capture technology gives players a unique experience, with more impact on their shots, creating new passing options, and more realistic ball physics. This is the year you can take on your friends and rival teams online. The next generation of this popular mode will include Clubs and Leagues, offering a consistent match experience with custom leagues, clubs and kits.
