**[]): The Pandemic Train is a kind of virus that makes people exclusively eat bacon (also known as viruses). The Pandemic Train first appeared on May 4, 1980 in Mark’s dismal mall (Mark’s miserable is a small, boring and non-happening mall that is disgusting and depressing). As the students arrived, the Pandemic Train started to spread to all the food sections of the mall. Very soon the mall was empty (except the trash in the restrooms). Soon the only things left were Bacon, Bacon and more Bacon. Overpriced and tasteless Bacon at that. The Pandemic Train spread to other malls all around the country. The quarantine stations have been set up and you are placed under constant supervision. They ask questions like: • I wonder what the Plague Dago is doing. • How can I use the “bacon sniper”? • How does the Clown eat the Bada Boop??? In real life, pandemics are something that is always there in our life. In the current scenario we have imposed social distancing to prevent the spread of the Corona virus. Schools are closed. We are not allowed to go outside. People are surviving in different ways. Also, we will have to agree that the pandemic seems real and the danger is there. But there are not too many Corona virus cases, so what can be the danger. Yes, it is indeed of great danger. It is a dangerous virus that has killed people. So what is the danger involved? These are the questions that my friend Michael has asked me. He has suggested all these, I have nothing to do with them. They are just suggestions. In this lecture we will discuss several ways in which we can survive the pandemic. We will not ‘go out’, wear masks and take antibiotics. We will survive the pandemic in different ways and I will share my views with you. \*\*Radha Adhikari\*\*: \*Currently busy volunteering in Karnataka, currently. **Q: Can [Midboss] be a "meta-tag"? In contrast to stackoverflow.com where questions on "How to..." with some hint to which software to use or tory to use are close-voted as "unhelpful", many questions regarding online communities are closed on stackoverflow.com as "dumb" or "not a real question". When voting for a question, "How to do..."-questions are somewhat like the "unanswered" questions, where the emphasis is put on finding the "right way to solve the problem" than learning from other users. However, when asking questions, the emphasis is put on learning from each others, since a possible correct solution might remain unknown. In my opinion, therefore it seems sensible that questions like the following should not be closed. How to best use my resource to... Is this a good... to use? How do you do...? QUESTION Considering that it could be relevant for many potential users, can [Midboss] be a "meta-tag**
