FileMaker Server 17.0.2.203 (x64) Multilingual.PatchQ: Count of related row I have a table with two columns i.e., gender and marks. so in one column we have male and in the other column we have female. now we have two marks in same row. As in this case we have to calculate the general performance (general marks) we have to calculate the percent of general performance. So how can we do that. Please help. A: select Gender, sum(marks) as Marks, (sum(marks)/count(*) * 100) as GenderPercent from tbl Determination of the immunoreactive folate content of food by microbiological assay. A microbiological assay for folate determination is described. It uses the inhibition of the growth of Lactobacillus casei on Mueller-Hinton agar supplemented with folic acid. The assay is specific, precise and linear with reference samples within the range 0.6-25 nmol folate/l. The protein-adjusted folate in flour and fruit and vegetable samples was determined by the use of a paired t test. The results showed good agreement with those obtained by a microbiological assay using Lactobacillus casei ATCC 19258. The results of the protein-adjusted folate analysis gave a ratio 1.6 (flour) and 1.4 (fruit and vegetable samples) compared to a ratio 1.1 from the microbiological assay. The influence of temperature, pH and anti-microbial activity of food components on the microbiological assay is discussed. Look out West, Chicago Mayor Rahm Emanuel is coming for you. Mayor Emanuel wants to increase local control over the Chicago Police Department by sharply reducing the city's political power over the police force and empowering the civilian board in charge of police oversight. If he gets his way, the day of the city appointing and firing the Chicago police commissioner will come to an end. And with that, the mayor gets a direct say in the day-to-day 6d1f23a050
