DMIFIT Tool And HPBQ138EXE

July 18, 2013 is a utility that HP service technicians use to write system information to the motherboard. This is sometimes referred to as the DMIFIT tool. Now... I know why it's used to write system information, but I didn't know it was happening. Luckily, I figured it out when my computer wouldn't turn on. After all, something I was taught when I was a kid when I had a problem was to press and hold the power button for ten seconds (I don't know why I do it now). This may sound counterintuitive, but it's just
