Consider the following question: Let A be a set of finitely many abelian subgroups of F , each of which is isomorphic to \mathbb{Z}^r for some $r \geq 1$. Prove that if $\mathbb{Z}^r \cap \bigcap A$ is non-empty, then A is finite. I already proved that a set of abelian subgroups has finite intersection iff it is finite. A: The answer is a combination of László's comment and @MaxBerman's answer. Since A is finite, $\mathbb{Z}^r \cap A$ is finite. Consider the free product of a set of copies of \mathbb{Z}^r with amalgamation by A . William Poole (botanist) William Poole (1762 – 2 October 1846) was an English botanist.
